

## Toy Fair 2014- The Brain is Attached to Muscles and Nerves

FEBRUARY 24, 2014

I love jacks. I also love the Korean version called Gong gi (hard g sound). My mom was a pro and I am just so-so but when I see that my kids can't do it, it kills me. Funnybone Toys made it easy to start learning this game. I think it's brilliant and of course, the great design of the game is sure to please. Remember, hand-eye-coordination really is "hand-eye-brain-coordination."
