

## Review: Funnybone Toys and Funnybones, the world's oldest game you've never played!

MARCH 12, 2014

Funnybone Toys is a toy design company creating games that have won nearly 20 awards. Their newest product, Funnybones™, the world's oldest game you've never played, will debut at the New York International Toy Fair 2014. Funnybone™ pulls inspiration from a classic game that has been played for over 2,000 years. FunnyBone Toys has revamped the ancient game with a modern twist.

### Our Thoughts:

We love Funnybones! I thought originally it was just for kids, but I was incredibly wrong. I found myself personally playing with this into the early morning hours, determined to get it right! I never did. Addicting and fun, every kid will love this new addition to the Funnybone Toys family. Numerous ways to play, all of which involve tossing the bones in the air and trying to catch them. It's really not as simple as it sounds.

You get five different colored bones, a carrying chain, a pouch and a rules book. Your imagination is key! Even though there are suggestions in the rules book on how to play, you can continue to create new ways to catch them; there isn't a wrong way! We have laughed and cried and been angry several times at these little bones; every time it's been because we can't catch them accordingly.

This is a great addition to our game repertoire, and is perfect for that special kid in your life! You can play by yourself or with others, and the ideas to game play are limitless! There will be hours of fun had when playing Funnybones™, the world's oldest game you've never played. Inexpensive this makes a great gift for any time of the year!
