In Emilee's opinion: Recently, I was given the opportunity to review Rolli Stamps. When the box arrived, Eli and I got to work on creating master pieces. The best part about each stamp was the surprise design. Sure, there was a picture of the design on the outside of each stamp but it didn't show the entire pattern.

Plus, there were 18 unique designs to choose from. My favorite stamps were the blue train and the cupcakes. I could see some future birthday cards or fun stationery in the future.

These stamps are also great for hand eye coordination. I noticed that it was a very useful tool for my three year old to handle. The stamps were intended for older children but I was there to help Eli. I wouldn't leave him unattended with these stamps but I don't trust my son with ink, markers, etc etc.

I also liked how you didn't need ink since it was already included. Fantastic idea!!! The only problem I had were the boxes. It was a little hard to get each stamp out of their box. I ended up throwing the boxes away and storing the stamps in a container. It wasn't a big deal and I found a solution. Overall, I was pretty impressed with Rolli Stamps and highly recommend this product to anyone that has children or loves to create fun projects.

Disclaimer: I received one or more of the products or services for free in the hope that I would mention them on my blog. Regardless, I only recommend products or services I use personally and believe will be good for my readers.
