My favorite game in this bundle is Anaxi. Anaxi is a word game that has 75 cards. Three of them are put together and you have to think of something that fits ALL three characteristics. This game is for ages 8 and up. It can be a little hard, so you may want to team up with your kids. It's great at forcing your brains to get creative! All players are trying to make the most connections and come up with the most unique answers as to what has all three traits. This can be persons, places or things. The person who has the most points at the end of five rounds wins!

Spirot is a game I really didn't understand. It's an art sequencing game with a dash of pixels and a splash of color. Players stack Spirot Cards onto the corresponding photographic Board Cards and create rows of sequences to win points. A sequence consists of three cards in a row that have one of four combinations:

- same color and same pixel pattern
- same color and different pixel patterns
- different colors and same pixel pattern
- different colors and different pixel patterns.

The first player with five points wins. I am horrible at recognizing the patterns, but my nieces seem to be rather good at it. They love seeing how quick they can find them. They really enjoy this game and I love watching them play it. It's for ages six and up, but the teens love it. I'm adding a YouTube video below so that you can better understand this one!

Funnybone's Juxtabo is super fun, colorful and unique!

Juxtabo is for ages 6 and up, but again my nieces love it. This game requires a bunch of different skills from other games you may play regularly, like chess or checkers. You can make a 4 x 4 board or one as big as 6 x 6, just using the Juxtabo pieces on a flat surface. Just draw challenge cards and try to find or make the pattern. You can add to the pattern by matching like colors. The winner of the game is the one with all the cards at the end! This is an awesome game that can go on for awhile, but my girls love it. I enjoy playing this one as much as they do because I tend to be a strategist in my games. This game requires that critical thinking, skills and luck.

Funnybone Toys truly has created an entire game line that is fun for all. If you are looking for new games to add to your family game night, I recommend you check them out!

ABOUT FUNNYBONE TOYS:

While most people love to play games, very few appreciate the "art" that goes into their creation. This is because, for the most part, the art is hidden in the background, secondary to game play. But a new game design company was tired of seeing the art of games taking a back seat to play...so they decided put artwork on equal footing. Funnybone Toys was created in 2011 to provide products that are a true combination of form, function, and beautiful, minimalist design. One of our favorite elements of design is color, so color reigns supreme in every one of our products. We launched Funnybone Muse in 2013, allowing us to offer other items that inspire us, that are outside the toy and game category. Every product that comes out of our design studio will show our company's commitment to beautiful, minimalist design.
